1990 Prospect Ct., Appleton, WI 54914 * 800-801-7590

T. HUEMANN WELL & PUMP SERVICES
39608 60TH ST
BURLINGTON, WI 53105

Home Owner	REMAX ADV/ GEORGE BESS
Well ID/Address	19123 101ST ST
Well City	BRISTOL WI
Sample Location	KITCHEN TAP
Lab #	697741
Collected By/Date	TODD 9/2/2026

Report Date *04-Sep-26*

Analyte	Result	Units	LOD	LOQ	Dil	Dig Date	Run Date	Mthd	Analyst	QC Code
Inorganic										
General										
Nitrate Nitrogen	**None Detected**	mg/l	0.08	0.27	1		9/3/2026	4500F	MO	1
NITRATE (as NO3+NO2)…A small amount of nitrate may be natural; however, elevated levels are an indication of nutrients entering the groundwater due to human activity. The maximum contaminant level set by the EPA is 10 mg/L (part per million).										
Metals										
Arsenic, Total	**None Detected**	ug/l	0.8	2.7	1		9/4/2026	3113B	AS	1
(as total As) Elevated arsenic levels are believed to cause skin cancer, and blood and nervous system disorders. The EPA and the WI DNR consider levels above 10 ug/L (parts per billion) in drinking water harmful.										
Organic										
Coliform and E-coli Bacteria										
E-coli	**None Detected**	mpn	1	1	1		9/3/2026	9223B	JM	1
E-COLI BACTERIA - Found in human and animal waste. The presence of E-coli is an indication of septic contamination, barnyard runoff, or another direct source of waste entering the drinking water system. RESULT– ABSENT - No E-coli bacteria were detected in this sample.										
Coliform	**None Detected**	mpn	1	1	1		9/3/2026	9223B	JM	1
COLIFORM BACTERIA…Coliform bacteria are very common in the open environment. They can be found in the soil and in surface water. However, any detection of coliform bacteria colonies in drinking water is unnatural. RESULT - Coliform bacteria were ABSENT in this sample. No Coliform bacteria were found in this sample. NOTE: The absence of bacteria does not necessarily mean that other pollutants are not present in the water. If you are concerned about other contaminants, further testing will be necessary.
