The following Notations may be referenced above.

Notation 1: The Maximum Exposure Guideline (MEG) is a health-based guideline set by the Maine Center for Disease Control and Prevention (MECDC). MEGs are recommendations for concentrations of chemical contaminants for all drinking water systems below which there is minimal risk of a harmful health effect resulting from long-term ingestion of contaminated water. These recommendations can be found online at https://www.maine.gov/dhhs/mecdc/environmental-health/eohp/wells/documents/megtable2016.pdf. Please contact one of the State of Maine's Bureau of Health Toxicologists, toll free, at 1-866-292-3474 for more information.

Notation 2: The Maximum Contamination Level (MCL) is set by the United States Environmental Protection Agency (USEPA) through the National Primary Drinking Water Regulations and are legally enforceable drinking water standards that apply to all public water systems. These regulations can be found online at https://www.epa.gov/dwreginfo/drinking-water-regulations or by calling the Safe Drinking Water Hotline at 1-800-426-4791. Contaminants at or above the MCL are considered to impart potential negative health effects.

Notation 3: The Secondary Maximum Contamination Level (SMCL) is set by the United States Environmental Protection Agency (USEPA) through the National Secondary Drinking Water Regulations and these contaminants are not considered to present a risk to human health at the SMCL . These regulations can be found online at https://www.epa.gov/sdwa/secondary-drinking-water-standards-guidance-nuisance-chemicals or by calling the Safe Drinking Water Hotline at 1-800-426-4791. Contaminants at or above (or below, only for pH) the SMCL may cause aesthetic considerations, such as taste, color and/or odor.

Notation 4: According to the EPA revised total coliform rule (effective April 1st, 2016) total coliform bacteria are no longer considered a primary contaminant. Total coliform bacteria are still used as indicator organisms for the presence of pathogens. Their presence in drinking water may indicate there is a route for pathogens (certain bacteria, viruses or protozoa) to enter the drinking water. Even though there is no longer an EPA limit, the presence of total coliform bacteria in drinking water is a problem requiring further action and investigation. If your water has tested positive for total coliform bacteria it is important to examine your water system and take action to eliminate the total coliform bacteria when possible.

If you have any questions regarding your results please call 207-747-1815

Reporting Limits as of 9/17/25: Chloride 2.00, Fluoride 0.20. Nitrite 0.20, Nitrate 1.00, Arsenic 1.00, Lead 1.00, Uranium 1.00, Copper 0.001, Iron 0.05, Manganese 0.001, Sodium 1.00, Calcium 0.20, Magnesium 0.1, Sulfate 40.00, Alkalinity 40.00, Antimony 0.0005, Chromium 0.002, Cadmium 0.002

Analytical results and reports are generated by Chanalytical Laboratories, Inc. at the request of and for the exclusive use of the person or entity (client) named on this report. Results, reports, or copies of the same will not be released by Chanalytical Laboratories, Inc. to any third party without the prior express written consent from the client named in this report. This report applies only to those samples taken at the time, place, and location referenced by the client. This report makes no express or implied warranty or guarantee as to the sampling methodology used by the individual performing the sampling. The client is solely responsible for the use and interpretation of these results, Chanalytical Laboratories, Inc. does not make express or implied warranties as to such use or interpretation. Chanalytical Laboratories, Inc. is not able to make and does not make a determination as to the environmental soundness, safety or health of a property from only the samples sent to their laboratory for analysis. Unless otherwise specified by the Client, Chanalytical Laboratories, Inc. reserves the right to dispose of all samples after the testing of such samples is sufficiently completed. Chanalytical Laboratories, Inc.'s liability extends only to the cost of the testing.
