SECTION VI – FLOOD HAZARD

For the purposes of this section, Maine law defines "flood" as follows:

(1) A general and temporary condition of partial or complete inundation of normally dry areas from:(a) The overflow of inland or tidal waters; or (b) The unusual and rapid accumulation or runoff of surface waters from any source; or

(2) The collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm or by an unanticipated force of nature, such as a flash flood or an abnormal tidal surge, or by some similarly unusual and unforeseeable event that results in flooding as described in subparagraph (1), division (a).

For purposes of this section, Maine law defines “area of special flood hazard” as land in a floodplain having 1% or greater chance of flooding in any given year, as identified in the effective federal flood insurance study and corresponding flood insurance rate maps.
