SOLAR ADVISORY AND QUESTIONNAIRE

(C.A.R. Form SOLAR, Revised 12/25)

ADVISORY

1. SOLAR OWNERSHIP: Solar power systems may be owned outright, owned with financing, owned with a lien or security interest on the real property, or leased. Many property owners who believe they own their solar power system may not have free and clear ownership of that system. Ownership could be subject to a deed of trust issued to secure a note financing the system or subject to a UCC-1 financing statement filed with the California Secretary of State. The solar power system financing may also be secured by an assessment against the real property that is collected through additional property tax payments for the period of financing (e.g., HERO or PACE). Because this type of financing appears on property tax statements, sellers may be unaware that the financing is secured by a lien on the property. Some owners obtain private lending to purchase a solar power system that is not secured by the real property or by the panels or other equipment attached to it. If the seller intends for these private loans to be paid off as part of a sale, terms may need to be added to the agreement to address this situation.

2. SOLAR EQUIPMENT, LIENS, POWER PURCHASE AGREEMENTS, AND SOLAR LEASES: If a solar power system is owned by the seller, the seller may have the right to remove the system or its components and install them on another property. If the system has been financed and the financing is secured by a lien on the property or the component parts, the seller should consult with the company about both the effect of removal of the system or its components on the lien and the consequence of any damage caused by the removal.

If the solar power system is leased, the seller may be obligated to make fixed or scheduled monthly payments, or be required to purchase all, or a portion, of the solar power generated at an agreed contractual rate from the solar company who may be granted the right to sell any excess energy to the electrical provider company (e.g., PG&E) in accordance with the system's governing regulatory scheme. Payments under such an arrangement can vary depending on the amount of energy created and used.

If the solar power system is leased, a buyer may be permitted to assume the terms of a solar lease but only with the approval of the solar company. Another lease clause may allow the purchase of the solar equipment prior to the end of the lease term or may allow the termination of the lease at cost with no retained ownership of the solar equipment (a "Buyout"). The lease may also contain a clause enabling the purchase of the equipment or the termination of the lease without any pre-agreed cost; in those cases, the cost will be an appraised value determined by the solar company.

Even a leased solar power system may have security interests attached, such as a UCC-1 or fixture filing document recorded in the county where the property is located. In some cases, the lender or lien holder may agree to allow the solar lien to subordinate to, or become secondary to, a new purchase loan. However, in many cases, the holder of the security interest will not release the priority of its security interest which means that the solar loan must either be paid off when the property is sold or that any buyer must purchase without obtaining any new financing.

3. ADVERTISING MATERIAL: All parties are advised that information posted in the Multiple Listing Service ("MLS") or other advertisements that are used to list and market a property for sale do not create contractual agreements. Thus, it is imperative that buyers of property with a solar power system ("Solar Property") receive and carefully review copies of all documents, including any solar agreement, underlying security agreements for owned equipment, or any other material or documentation that the seller possesses prior to the buyer making any final decision regarding the solar power system. Buyers should not simply rely on the information in the MLS or any other advertising material.

4. PURCHASE CONTRACT AND TRANSFER ISSUES: The C.A.R. Purchase Agreements include a contingency for the review of leased or lien items and systems which gives the buyer a right to review any agreements or documents related to any solar power system and to properly evaluate all of the present and future terms and conditions, including the costs of accepting the existing solar power system. The default language provides that the system is being transferred, and the buyer has a contingency to determine whether the buyer is willing or able to assume any lease, lien, or other agreement. If the solar power system is not intended to be transferred with the property, the parties may need to modify the contract.

If a leased or lien system is to be assumed by the buyer, the solar company may take steps to ensure its priority interest against the property and/or the buyer's lender may require a solar endorsement from the title company. If this occurs, escrow could be delayed. Buyers and sellers should be aware that because any buyout or assumption of a solar power system could impact closing escrow, they should consider including a provision in the purchase agreement to allow for the possible extension of the closing date to facilitate dealing with any problems that may arise because of the solar power system.

Buyers and sellers need to investigate and understand the obligations involved with transferring the solar power system. This may require signing paperwork regarding the assumption or transfer of the lease or relating to the lien. Additionally, there may be financial obligations required either to facilitate and close escrow, or that will remain ongoing for the buyer after close of escrow. The seller may have prepaid the lease for a certain period of time, and the buyer will need to understand the obligations that remain under the terms of that lease or the ramifications at the end of the lease. There may be maintenance, power purchase, or other agreements, which could apply even when the seller owns the solar power system outright. When there are financial obligations, it is important to understand the timing of those obligations, and whether they will need to be satisfied prior to close of escrow, at close of escrow, or after close of escrow.

Property Address: 5368 Bel Air Drive W, Kelseyville, Ca 95451 Date: _____

5. **SOLAR EVALUATION, RECOMMENDATIONS, AND LEGAL ADVICE:** Real estate brokers and their agents are not qualified to evaluate the terms, conditions, and any security interests in a solar power system. They are also not qualified to determine the quality of solar equipment or the impact of any regulatory scheme on the ownership or use of solar equipment. Buyers and sellers of Solar Property should consider retaining the services of a solar photovoltaic system inspector if one is available in the area where the property is located.

Brokers recommend that sellers and buyers of Solar Property exercise diligence in obtaining copies of any contracts, agreements, or other documents related to any possible solar power system security interests as soon as practicable so they can evaluate what needs to be done to facilitate a sale of the property. Sellers of Solar Property, prior to entering into a purchase agreement, should determine if a buyout or loan assumption is available and at what cost or terms so as to make full and complete disclosure to potential buyer and to avoid delays in closing escrow.

Whether or not a solar photovoltaic system inspector is used, buyers and sellers should consult with a qualified California real estate attorney prior to entering into any agreement to purchase or sell Solar Property. That attorney should evaluate the existing solar documentation and properly craft language to be included in the purchase agreement that will best protect the interests of their clients. Real estate brokers and their agents are allowed to prepare standard real estate transaction documents, but they are not qualified to create specialized contract language that may be needed to address the specific issues involved in any specific Solar Property.

AGENT VISUAL INSPECTION DISCLOSURE
(CALIFORNIA CIVIL CODE § 2079 ET SEQ.)
For use by an agent when a transfer disclosure statement is
required or when a seller is exempt from completing a TDS
(C.A.R. Form AVID, Revised 6/24)

This inspection disclosure concerns the residential property situated in the City of Kelseyville,
 County of Lake, State of California, described as 5368 Bel Air Drive W
 ("Property").

☐ This Property is a duplex, triplex, or fourplex. An AVID is required for all units. This AVID form is for ALL units (or ☐ only unit(s) _____).

Inspection Performed By (Real Estate Broker Firm Name) Country Air Properties Inc.

California law requires, with limited exceptions, that a real estate broker or salesperson (collectively, "Agent") conduct a reasonably competent and diligent **visual** inspection of reasonably and normally accessible areas of certain properties offered for sale and then disclose to the prospective purchaser material facts affecting the value or desirability of that property that the inspection reveals. The duty applies regardless of whom that Agent represents. The duty applies to residential real properties containing one-to-four dwelling units, and manufactured homes (mobilehomes). The duty applies to a stand-alone detached dwelling (whether or not located in a subdivision or a planned development) or to an attached dwelling such as a condominium. The duty also applies to a lease with an option to purchase, a ground lease or a real property sales contract of one of those properties.

California law does not require the Agent to inspect the following:

- Areas that are not reasonably and normally accessible
- Areas off site of the property
- Public records or permits
- Common areas of planned developments, condominiums, stock cooperatives and the like.

Agent Inspection Limitations: Because the Agent's duty is limited to conducting a reasonably competent and diligent visual inspection of reasonably and normally accessible areas of only the Property being offered for sale, there are several things that the Agent will not do. What follows is a non-exclusive list of examples of limitations on the scope of the Agent's duty.

Roof and Attic: Agent will not climb onto a roof or into an attic.

Interior: Agent will not move or look under or behind furniture, pictures, wall hangings or floor coverings. Agent will not look up chimneys or into cabinets, or open locked doors.

Exterior: Agent will not inspect beneath a house or other structure on the Property, climb up or down a hillside, move or look behind plants, bushes, shrubbery and other vegetation or fences, walls or other barriers.

Appliances and Systems: Agent will not operate appliances or systems (such as, but not limited to, electrical, plumbing, pool or spa, heating, cooling, septic, sprinkler, communication, entertainment, well or water) to determine their functionality.

Size of Property or Improvements: Agent will not measure square footage of lot or improvements, or identify or locate boundary lines, easements or encroachments.

Environmental Hazards: Agent will not determine if the Property has mold, asbestos, lead or lead-based paint, radon, formaldehyde or any other hazardous substance or analyze soil or geologic condition.

Off-Property Conditions: By statute, Agent is not obligated to pull permits or inspect public records. Agent will not guarantee views or zoning, identify proposed construction or development or changes or proximity to transportation, schools, or law enforcement.

Analysis of Agent Disclosures: For any items disclosed as a result of Agent's visual inspection, or by others, Agent will not provide an analysis of or determine the cause or source of the disclosed matter, nor determine the cost of any possible repair.

What this means to you: An Agent's inspection is not intended to take the place of any other type of inspection, nor is it a substitute for a full and complete disclosure by a seller. Regardless of what the Agent's inspection reveals, or what disclosures are made by sellers, California Law specifies that a buyer has a duty to exercise reasonable care to protect himself or herself. This duty encompasses facts which are known to or within the diligent attention and observation of the buyer. Therefore, in order to determine for themselves whether or not the Property meets their needs and intended uses, as well as the cost to remedy any disclosed or discovered defect, **BUYER SHOULD: (1) REVIEW ANY DISCLOSURES OBTAINED FROM SELLER; (2) OBTAIN ADVICE ABOUT, AND INSPECTIONS OF, THE PROPERTY FROM OTHER APPROPRIATE PROFESSIONALS; AND (3) REVIEW ANY FINDINGS OF THOSE PROFESSIONALS WITH THE PERSONS WHO PREPARED THEM. IF BUYER FAILS TO DO SO, BUYER IS ACTING AGAINST THE ADVICE OF BROKER.**
