To whom it may concern:

On May 07, 2026, Acal Engineering, Inc. performed a field survey to locate existing property monuments for APN 181-102-58. The survey plat shows the property boundary along with what monuments were found and their locations. Two monuments were missing but had fence posts close to their location. One other monument was missing and we set a wood lathe marked "search point" where we calculated the location.

The work performed was for recovery purposes only.

Sincerely,

Jeff Fretz
Assistant Engineer
