

Experience elevated lake living in this recently remodeled Lake Nacimiento retreat, where luxury, comfort, energy efficiency, and smart technology come together in one exceptional home. This impeccably renovated three-story residence features four bedrooms, six bathrooms, breathtaking lake views, and spectacular western sunsets from multiple outdoor living spaces.

Thoughtfully upgraded from top to bottom, the home is designed for effortless living and long-term efficiency. A new 50-year roof is paired with a solar system that currently generates an annual energy credit, while a 275-gallon propane tank supplies the home and one of the outdoor barbecues. Additional improvements include LED lighting throughout, a whole-house water filtration system, water softener, reverse osmosis drinking water system, and dual-glazed Low-E tinted windows. Select windows are equipped with exterior storm shutters for added energy efficiency, privacy, and security, while custom interior window coverings—including remote-controlled blinds—complete the home.

Comfort is prioritized year-round with individual mini-split heating and cooling systems on every floor, allowing each level to maintain its own temperature. A whole-house fan cools the home in minutes during warmer months, while a custom remote-controlled propane fireplace with an integrated blower provides efficient heat throughout the winter. A comprehensive security system includes door and window contacts along with surveillance cameras for added peace of mind.

Designed for both entertaining and everyday living, the home features six televisions, including an outdoor-rated TV, with two surround sound systems and two sound bars. Built-in speakers serve the living room, dining area, kitchen, and main deck, all conveniently controlled individually or together from your smartphone.

The spacious chef's kitchen is beautifully appointed with premium Wolf appliances, dual Bosch dishwashers, and separate Sub-Zero column refrigerator and freezer units. Ample cabinetry, pull-out shelving, and a walk-in pantry with custom built-in shelving provide exceptional storage. Two under-counter beverage and wine refrigerators add convenience, including one on the lower level with a built-in ice maker and another on the main outdoor deck.

The luxurious primary suite offers a private office with custom built-in cabinetry and desk, while the oversized walk-in closet features extensive hanging space, custom dresser cabinets, and a dedicated shoe wall. Every bedroom includes custom closet organizers and ceiling fans. Throughout the home, the bathrooms showcase custom cabinetry, designer tile, premium fixtures, custom mirrors, two spa tubs, and a relaxing steam shower.

Wine enthusiasts will appreciate the wine closet with storage for more than 100 bottles.

Outdoor living is equally impressive. Two expansive decks, each equipped with solar sunshades, provide the perfect setting for entertaining while taking in the panoramic lake views. The main deck features a built-in barbecue with a commercial-grade hood, comfortable seating around a fire pit, an outdoor television, and a retractable shade for additional comfort. The lower deck includes another barbecue, an illuminated dartboard, and generous space for outdoor games or a future spa.

The oversized three-car garage is equipped with three large ceiling mounted storage racks, full-size refrigerator, full-size freezer, and commercial ice maker, making it ideal for entertaining or long weekends at the lake. A large parking pad accommodates a boat, trailer, or RV, while additional driveway parking provides space for three to four more vehicles. Storage is abundant, with two illuminated exterior storage closets and a spacious storage room beneath the garage complete with built-in shelving.

One of the property's most desirable amenities is its private road leading directly to a private dock. Launch your boat with ease and keep it in the water for the season—or even year-round if desired. The generously sized dock offers the perfect place to relax with family and friends, swim, float, or simply enjoy the peaceful surroundings. A large shaded seating area provides a comfortable escape from the sun while you take in everything Lake Nacimiento has to offer.

This remarkable home combines exceptional craftsmanship, luxury finishes, smart technology, and resort-style amenities to create a truly turnkey lakefront lifestyle.
