

- Owner is responsible to confirm project feasibility, including, but not limited to, any project limitations due to setbacks, property lines, easements, or environmental requirements, prior to submittal of project plans.
- These plans are representative of existing work visually accessible to designer. Contractor and owner shall be responsible to field verify existing framing and foundation specifications prior to beginning construction.
- Details and dimensions on existing construction shall be verified at the site by the contractor and any discrepancy between the plans and existing condition shall be promptly reported to the engineer.
