SUBJECT: EXPIRATION OF BUILDING PERMIT NO. 1688

Dear Resident:

This correspondence is to inform you that the above noted permit covering re-roof & smoke detectors has expired. Section 303 (d) of the Uniform Building Code states that, once construction is commenced, inspections must be at 180 day maximum intervals or the permit expires. Our records indicate that your project falls under this criteria.

However, if the delay in inspections is beyond your control, the City can grant one 180 day extension of your permit. If this is the case, it will be necessary for you to advise us in writing of the circumstances within 15 days for consideration.

Upon expiration of the permit, the City will file all paperwork pertaining to the project and will note that the project has not been finalized. This may have an impact upon the future status of your property and your ability to sell and / or refinance the property. Furthermore, if the permit expires, you will be required to resubmit a new permit application, plans, and fees for the project.

If you have any questions please contact the Building Division at (714) 562-3636.

Very truly yours,

Lee E. Hitchcock
