THE WOODLANDS

More to Love About This Home

SPACE TO LIVE | FREEDOM TO EXPLORE | HOME FOR IT ALL

1

EXPANSIVE DECKED ATTIC STORAGE

A second attic access from the garage leads to a fully decked, walkable attic with standing room and an abundance of convenient storage space.

2

ENHANCED INSULATION

Additional insulation has been installed throughout the exterior walls of the home, including the garage, for added comfort and energy efficiency.

3

VERSATILE GARAGE SPACE

The garage can be cooled and transformed into additional entertainment space for parties, holidays, or gatherings, with potential for future conversion into an additional living area.

4

EXTENDED PROPERTY & PARK-LIKE SETTING

The property extends beyond the rear chain-link fence into a maintained, park-like area, perfect for peaceful walks and enjoying the natural surroundings.

5

FLEXIBLE OUTDOOR POSSIBILITIES

Take advantage of the additional land to expand your outdoor living space or add storage sheds and covered areas. Per HOA guidelines, residents may also store boats and RVs, and even have horses in this neighborhood.

6

REINFORCED PAVER ACCESS

The pavers extending from the gate toward the rear of the property have been reinforced to accommodate vehicles, allowing convenient truck access through the double gate to the land beyond the fenced yard.

7

EXPLORE THE NATURAL SURROUNDINGS

Venture beyond the maintained property into the surrounding wooded area, which eventually connects toward Spring Creek.

8

SOUND-INSULATED PRIMARY RETREAT

The primary bedroom suite features additional soundproofing within the walls, creating a quieter, more peaceful retreat even while entertaining elsewhere in the home.

9

ADDED PRIVACY

A county easement borders the north side of the property, providing additional separation and ensuring that no one will ever build on the north side of you.

10

WHOLE-HOME GENERATOR

A built-in generator automatically powers on and off as needed and is designed to keep the entire home running — including the swimming pool — so you never miss a beat.

11

WHOLE-HOME SURGE PROTECTION

A surge protector has been professionally installed at the CenterPoint electrical box to provide an added layer of protection against power surges throughout the entire home.

*Thoughtful Features.
A More Enjoyable Lifestyle.*
