- A. **"Groundwater"** means water percolating below the surface of the earth. Groundwater is usually found in subsurface reservoirs or aquifers and is accessed by Water Wells.
[Note: Unless severed from the surface estate, Groundwater is owned by the surface landowner who may be able to access the Groundwater by drilling a Water Well in compliance with the law and rules of the applicable Groundwater District, if any.]
- B. **"Groundwater District"** means a local or regional Groundwater Conservation District, Underground Water Conservation District, Subsidence District, or other special district or authority that regulates the drilling or operation of Water Wells.
[Note: Not all land in Texas is subject to a Groundwater District.]
- C. **"Surface Water"** means water in lakes, rivers, creeks, streams, and in the bays, estuaries, and arms of the Gulf of Mexico.
- D. **"Surface Water Rights"** means a permit, certified filing, or certificate of adjudication administered by the Texas Commission on Environmental Quality (TCEQ) that authorizes the diversion, impoundment, or use of Surface Water.
[Note: Not all diversions, impoundments, or uses of Surface Water require a Surface Water Right.]
- E. **"Water Well"** means an artificial excavation that is drilled or dug for the purpose of exploring for or producing Groundwater.
[Note: The drilling and operation of a Water Well may be regulated, restricted, or prohibited in a Groundwater District.
