

19135 ROYAL ISLE DRIVE HAS BASE ENERGY!

What is Base Power Company?

Base Power Company is a Texas-based energy provider that pairs reliable electricity service with an integrated home backup battery system.

You can learn more about who they are here: <https://www.basepowercompany.com/>

Taking Over the Plan & Pricing

If a new owner wants to keep the system and take over the electricity plan, there is absolutely no upfront cost for the battery. They simply pay a \$20/month membership fee and 8.5¢/kWh for electricity, plus the standard Centerpoint delivery charges (which apply regardless of which electricity provider you choose).

You can review more on their service areas and pricing structure here:

<https://www.basepowercompany.com/centerpoint#pricing>

How the Battery Works

The battery provides seamless protection and grid support. Base charges it when power is affordable and helps stabilize the Texas grid during peak demand. If an outage occurs, the battery kicks in instantly to provide uninterrupted whole-home backup power. All without the noise, fumes, or maintenance of a traditional gas generator.

You can dive deeper into how their battery technology and grid-balancing works here: <https://www.basepowercompany.com/how-it-works>

Battery Removal

If you ever decide you no longer want the service and wish to have the battery taken down for any reason, there is just a flat \$500 fee for Base to come out and remove the equipment.

Frequently Asked Questions

For specific questions about the battery specs, outage preparation, or taking over the account, Base has a comprehensive Help Center and FAQ section available here: <https://help.basepowercompany.com/en/>
