

2/5/26

5. This survey was done without the benefit of a correct TGA Report and the Report did not contain the final results for periodic sampling in the 600°C treatment. Credit assessments may have been given which are not obtained herein.
6. Activity is increased using the correct F.E.M.A. based Phosphate test kit no. 46307-01-000, dated July 22, 2000. The test DOES NOT use 46307-01-000, dated July 22, 2000.
