

Congratulations on your new Inspired LVP Flooring from FloorQuest!

Before moving furniture onto your new Inspired floor, please read through some quick care and maintenance 'Do's and Don'ts'.

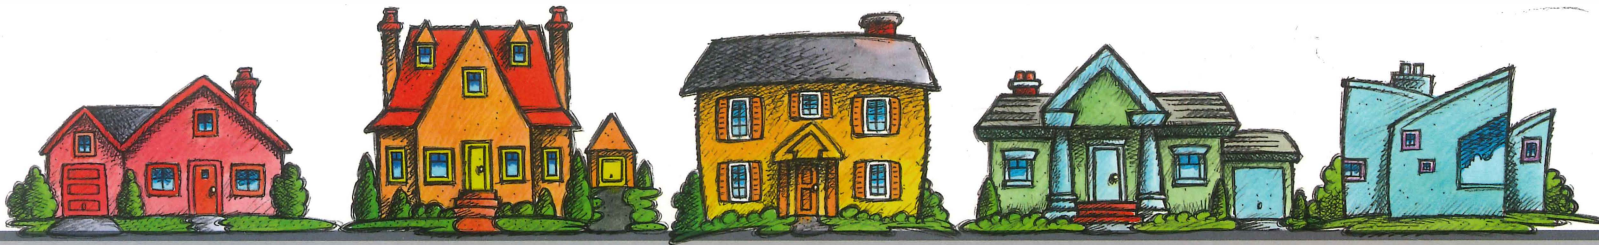

DO. When cleaning your Inspired floor for the first time, make sure to vacuum (with the beater bar off), sweep well, or dust mop the entire the floor. After the initial cleaning, lightly go over the surface with a (slightly) damp mop to remove any remaining dust and particles.

DO. While your Inspired LVP flooring is waterproof and highly scratch resistant, we suggest using door mats at all entrances. We also recommend using non-abrasive and non-staining floor protectors under furniture.

DO. When cleaning your Inspired LVP flooring, use a pH-neutral floor cleaner. You can find a wide variety of LVP cleaners at your favorite department / hardware / grocery store, or at Amazon.com. All of these should offer a wide selection of LVP flooring cleaners that meet the above criteria.

DON'T. Do not use treated dust mops, pre-coated 'wipe and shine' products, steam mops, or products that contain waxes, polishes, or detergents that can leave a dull residue on your floor. If you prefer using a vacuum, make sure the rotating beater bars are turned off!

Your friends at FloorQuest wish you the best in your new home and we sincerely thank you for selecting Inspired.
