Solar Panels and Battery System

Solar panel system (14.44 kW) with Enphase microinverters (25-year warranty) installed in 2021. Enphase full battery back-up system (15 kWh) installed in 2023. Battery back-up system is fully integrated for immediate whole-home back-up without even knowing you lose power. Enphase monitoring is available for solar and battery system. Monitoring allows you to see the solar production, battery capacity, and home electricity consumption to know exactly where your electricity is going.
