DESCRIPTION OF WORK

Camera drain tile to check on structural integrity. Inspect sump pump and discharge line. Upon camera inspection; both drain tile lines have offset beginning at 16 feet for drain tile line toward clean out access in floor and 18 feet for drain tile line toward stack. For sump pump; recommend placing new sump pump on block to minimize sand infiltrating pump. Also recommend flush 1 1/2' check valve to reducer on 1 1/4' galvanized to smooth flow. Seems to be chocking out because of reductions.
