AI Overview

In the City of Muskego, WI, the general allowance under the municipal code permits a density of **1 head of livestock (such as a horse) per acre** on qualifying residential or rural estate lots. eCode360 +1

Key Requirements

- **Minimum Lot Size:** Properties generally need a minimum threshold (such as qualifying rural or estate parcels starting around 2.75+ acres) to house horses. For instance, a 3-acre lot allows for up to 3 head of livestock. wisconsinpropertymap.... +1
- **Animal Combinations:** Different types of livestock and fowl can be combined, but the total density cannot exceed the ratio of 1 large livestock animal per acre (e.g., a 3-acre lot can have 1 horse, 1 sheep, and 20 fowl, or equivalent scaling). eCode360
- **Contiguous Land:** You can combine adjacent parcels under the same ownership to calculate your total allowable animal count. eCode360

Further Exploration

- Review specific district rules on the City of Muskego eCode360 Code Library.
- Check regional guidelines via the Waukesha County Livestock Ordinances Overview. eCode360 +1

If you can share your **specific property address** or **zoning district**, I can help you confirm the exact rules and minimum acreage requirements for your specific lot.
