DESCRIPTION OF WORK

Found water heater T&P valve leaking onto floor. Unit is from 2021 so warranty on part is valid. Also while here i blew out condensation lines for ac unit to help with condensation dripping. inspection inside t&P showed excessive corrosion leading me to believe to be the culprit behind failed valve. House is on a well and psi was in good range and water not excessively hot. Also checked warranty on website and still was good for the rest of the year.blew out condensation tubing as well. Time will tell if further is needed but lines are now clean on boxed coil
