RADON GAS MEASUREMENT REPORT

Client: Lee Gruenwald Test Start: 09-11-26 1:00 PM Test End: 09-13-26 1:00 PM

Location: W180 N9801 Riversbend Circle W, Germantown,WI Tech: Scott Shirley

This is the report of a radon gas screening measurement. The measurement was performed using a continuous radon monitor (CRM), and was performed in conformance with test protocols established by the US Environmental Protection Agency in the document entitled "Protocols for Radon and Radon Decay Product Measurements in Homes."

The report in the adjacent column is the report that was obtained from the CRM upon completion of the measurement period.

During the measurement period radon gas measurements were recorded once every hour.

The Average level of Radon gas was recorded to be: 0.45 pCi/L

Explanation of Report Data:

The results indicate that the monitoring device registered below the United States Environmental Protection Agency (EPA) action level of 4.0 picoCuries per liter of air (pCi/L). No further action is required at this time.

For more information you can go to the EPA website: www.epa.gov/radon/ .
You can call the WI State radon office, at 888-569-7236 or see the following website http://www.dhfs.state.wi.us/dph_beh/RadonProt/Lists/MitigProf.htm to obtain more information, including a list of EPA or State-approved radon contractors who can fix or can help you develop a plan for fixing the radon problem.

Other Information: In the printout, the letter "p" or "T" may appear next to a given value. The "p" indicates that, during this measurement interval, the power was disconnected from the CRM. The "T" indicates that, during this measurement interval, the CRM was disturbed or moved.

☑ The radon gas measurement was completed and there is no evidence that the CRM was tampered with in any way. Therefore, the average values contained in this report reflect the radon gas concentration at the time of the test and should not be construed as either predictive or supportive of a similar measurement conducted at another time in the same structure.
