WELL USE STATUS: Indicate the use status of each well. CHECK ONLY ONE (1) BOX PER WELL.

IN USE: A well is "in use" if the well is operated on a daily, regular, or seasonal basis. A well in use includes a well that operates for the purpose of irrigation, fire protection, or emergency pumping.

NOT IN USE: A well is "not in use" if the well does not meet the definition of "in use" above and has not been sealed by a licensed well contractor.

SEALED: A well is "sealed" if a licensed contractor has completely filled a well by pumping grout material throughout the entire bore hole after removal of any obstructions from the well. A well is "capped" if it has a metal or plastic cap or cover which is threaded, bolted or welded into the top of the well to prevent entry into the well. A "capped" well is not a "sealed" well.

If the well has been sealed by someone other than a licensed well contractor or a licensed well sealing contractor, check the well status as "not in use."
