Any Additional Information:

Had some water in the lower level in April 2013 after especially heavy rain. The Stumpf Construction crew was on scene immediately, removed the carpet from the lower level, and then they cleared out the footing drains so the water could flow freely away from the foundation. In the days following, I had the ground on the north, east, and west of the property regraded, and also installed a French drain system in the driveway. Since all of this work has been done, there have been no issues with water in the lower level.

Had ants one year, but after the exterior of the house was redone there have been no issues. When the siding was replaced, I had the crew put a heavy bead of caulk behind the bottom siding boards where they meet the foundation and I haven't seen any ants after that was done.

There is a foundation crack in the utility room, but Stumpf Construction said they had no concerns about it. Over the years, I have not noticed the crack becoming any worse.

Please use additional sheets as necessary.
