Boiler is in good condition

A Boiler tune-up keeps your heating system in good working order. It includes:

- Check/Adjust Water Pressure and Temperature
- Checked burner
- Inspect heat exchanger
- Inspect gas pressure & flame
- Inspect igniter/pilot light
- Inspect pumps/zone valves
- Check Operation

When completed you will receive a recommendation for any further maintenance or repair needs of your system.

Found boiler to be in good operationally, combustion chamber is clean and intake. Tested doors and around casing of boiler with combustion analyzer and did not detect and CO leaking from the unit. Checked draft on chimney and no CO was spilling out the draft hood at this time. Original gas train has been convert to newer style gas vavle verse the three piece system that may have been on it in the past. Gas Co k with pilot port has been capped and no gas leaked was detected at this time near that location.
System is in good overall operational condition.
